CORNER AT DUSK · VISUALISATION

Seven storeys of soft white lines, *edged in light.*

Heights 777 is a seven-storey residential building on Parakou Street, in the heart of Wuse II. Eighteen one- and two-bedroom residences occupy six floors above a covered parking level, served by two lifts and three stairs.

Every residence opens onto a planted balcony behind a frameless glass balustrade, and every slab edge carries a continuous strip of warm light. The building reads at dusk the way it reads at noon: a stack of curved white trays, floating off a charcoal core.

Interiors are finished to a single standard throughout: **polished granite** in living rooms and lobbies, vitrified tile in bedrooms, full-height glass sliding doors onto the balconies, and composite pivot security doors at every entrance.

04	Fourth floor	3 RESIDENCES
03	Third floor	3 RESIDENCES
02	Second floor	3 RESIDENCES
01	First floor	3 RESIDENCES
G	Ground	ARRIVAL · PARKING

Three residences on every floor from 01 to 06. The west wing of floors 05 and 06 is a one-bedroom penthouse; on the sixth floor its lounge opens onto a private infinity pool. Each level is described on sheet 08.

Drawn twice: once by the sun, *once by its own light.*

The same arrival view under two skies: at noon, and at dusk when the slab edges take over from the daylight.

Noon

ARRIVAL · VISUALISATION 05

Dusk

ARRIVAL · VISUALISATION 04

The plan is simple: three residences to a floor, two lift cores between them, and balconies wrapping the corners. The elevation makes that plan legible. Each floor is a single white slab with rounded ends. The glazing sits well back from the slab edge, so the trays read as continuous, and the planting on every balcony softens the line without breaking it.

01 Curved slab edges

Every balcony slab rounds its corners and carries a recessed LED strip along its full length. At dusk the building is outlined floor by floor, with no visible fittings.

02 Glass, set back and planted

Floor-to-ceiling glazing behind frameless glass balustrades. Planters run along the balcony edge on every floor, so the greenery of the street continues up the building.

03 A charcoal core

The lift and stair cores are clad dark, with a tall fluted glass panel and slender vertical light lines. Against it, the white wings appear to float.

04 VISUALISATION · 06 / 07

The balconies from above, *planted on every floor.*

Looking down the front of the building, the slabs stack as a run of curved white trays. Each carries a planter along its edge and a frameless glass balustrade behind it, so the greenery of Parakou Street continues up all six residential floors.

The glazing sits well back from the edge. From the street the balconies read as one continuous line per floor; from the rooms, the planting frames the view without interrupting it.

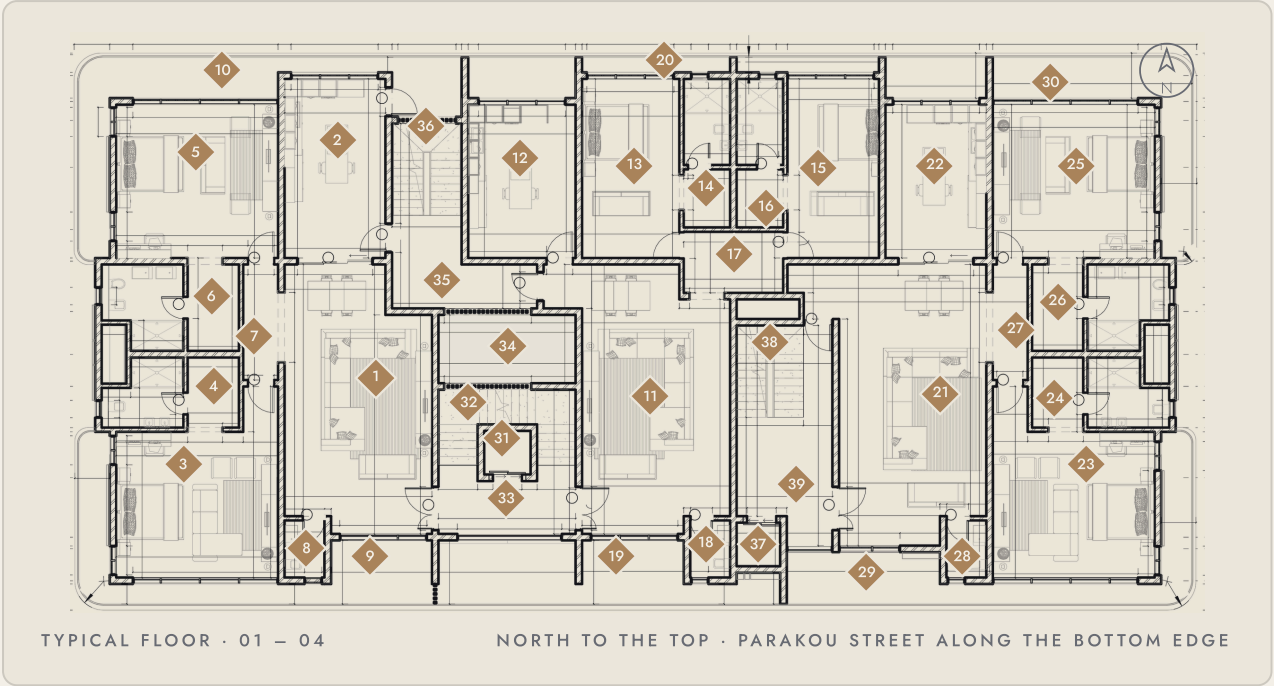

18 Balconies, front and rear, one pair to every residence

3.15_m Floor to floor on every level

23.5_m Parapet height above the ground-floor slab

Three to a floor. Every bedroom with its own *dressing room and bath*.

Sixteen two-bedroom residences fill floors 01 to 06: west, centre and east around two lift cores, each with a guest WC and balconies front and rear. The numbered markers sit where the rooms are labelled on the drawings.

West residence

TWO BEDROOMS

The largest of the three, wrapping the north-west corner. The living room and a separate kitchen open onto the deepest of the front balconies; both bedrooms have their own dressing room and bath.

- Living room
- Kitchen, separate, with its own balcony
- Bedroom 1 with dressing room and bath
- Bedroom 2 with dressing room and bath
- Entrance lobby and guest WC
- Balconies, front and rear

Centre residence

TWO BEDROOMS

Entered from the main lobby beside the lift. The living room faces the street; the kitchen and both bedrooms sit along the quiet rear elevation, each with its own balcony.

- Living room, facing the street
- Kitchen, on the rear elevation
- Bedroom 1 with dressing room and bath
- Bedroom 2 with dressing room and bath
- Entrance lobby and guest WC
- Balconies, front and rear

East residence

TWO BEDROOMS

Mirrors the west plan at the north-east corner. A living room with a deep front balcony, a separate kitchen, and two bedrooms of equal standing, each with a dressing room and bath.

- Living room
- Kitchen, separate, with its own balcony
- Bedroom 1 with dressing room and bath
- Bedroom 2 with dressing room and bath
- Entrance lobby and guest WC
- Balconies, front and rear

WEST RESIDENCE

- Living room
- Kitchen
- Bedroom 1
- Dressing room and bath
- Bedroom 2
- Dressing room and bath
- Entrance lobby
- Guest WC
- Balcony, front
- Balcony, rear

EAST RESIDENCE

- Living room

- Bedroom 1
- Dressing room and bath
- Bedroom 2
- Dressing room and bath
- Entrance lobby
- Guest WC
- Balcony, front
- Balcony, rear

CENTRE RESIDENCE

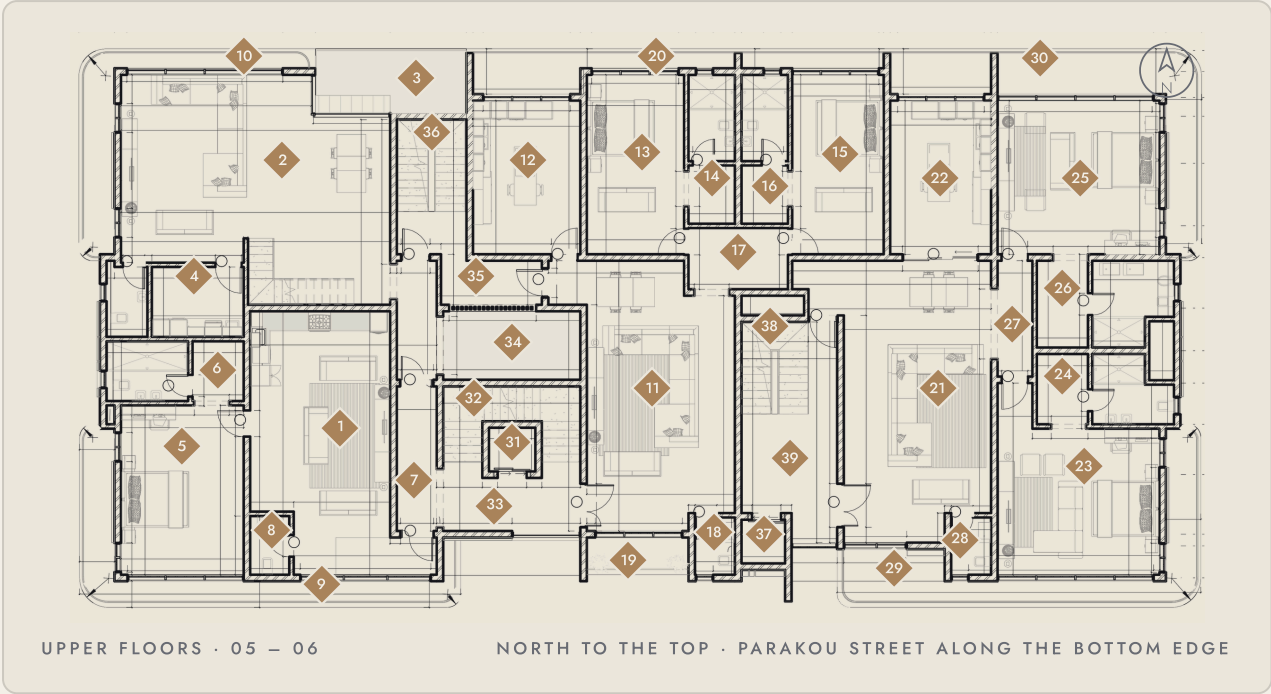

- Living room
- Kitchen
- Bedroom 1
- Dressing room and bath
- Bedroom 2
- Dressing room and bath
- Entrance lobby
- Guest WC
- Balcony, front
- Balcony, rear

SHARED CORE

- Lift, west core
- Main stair, west
- Lobby, west core
- Courtyard lightwell
- Courtyard lobby
- Back stair
- Lift, east core
- Main stair, east
- Lobby, east core

The upper floors: *a penthouse to the west, a pool on top.*

On floors 05 and 06 the west wing becomes a one-bedroom penthouse with a second lounge and, on the crowning floor, a private infinity pool at the corner of the building. The centre and east residences keep the typical plan.

West penthouse

ONE BEDROOM · POOL

The west wing reconfigured: a living room, a bedroom suite, a small kitchen and a second, larger lounge that opens, on the top floor, onto a private infinity pool at the corner of the building.

- Living room
- Lounge, with the infinity pool on the top floor
- Kitchen
- Bedroom suite with dressing room and bath
- Entrance lobby and guest WC
- Balconies, front and rear

Centre and east residences

TWO BEDROOMS EACH

On the upper floors the centre and east residences keep the typical plan: a street-facing living room and a rear kitchen at the centre, and the mirrored corner residence to the east, every bedroom with its dressing room and bath.

- Living rooms on the front elevation
- Kitchens, separate
- Two bedrooms each, with dressing rooms and baths
- Entrance lobbies and guest WCs
- Balconies, front and rear

The sixth floor

CROWNING LEVEL

The crowning floor: the west penthouse with its lounge opening onto a private infinity pool at the corner, and two two-bedroom residences at the centre and east.

- Infinity pool at the north-west corner
- Lounge opening onto the pool
- Roof slab at +22.05 m · parapet at +23.55 m

22.05_m Roof slab, with a PU-insulated longspan aluminium roof on a steel truss above

2 + 3 Two lifts, three stairs: a core at each end of the lobby, and a back stair beside the courtyard

LEVEL BY LEVEL ROOF TO GROUND

- RF** **Roof +22.05 M SLAB**
A PU-insulated longspan aluminium roof on a steel truss, hidden behind a 1.5 m parapet at +23.55 m. Drainage runs to a concrete slab at the eaves.
- 06** **Sixth floor PENTHOUSE LEVEL**
Two two-bedroom residences at the centre and east, and the west penthouse: a one-bedroom residence whose lounge opens onto a private infinity pool at the corner of the building.
- 05** **Fifth floor PENTHOUSE LEVEL**
The same plan as the floor above without the pool: centre and east two-bedroom residences, and the west wing arranged as a one-bedroom penthouse with a second lounge.
- 04** **Fourth floor TYPICAL PLAN**
Three two-bedroom residences: west, centre and east, each with a walk-in dressing room and bath to both bedrooms, a guest WC and balconies front and back.
- 03** **Third floor TYPICAL PLAN**
Three two-bedroom residences: west, centre and east, each with a walk-in dressing room and bath to both bedrooms, a guest WC and balconies front and back.
- 02** **Second floor TYPICAL PLAN**
Three two-bedroom residences. On this floor the front balconies are at their deepest across all three residences.
- 01** **First floor +3.15 M · FIRST RESIDENCES**
The first residential floor, one level above the parking. Three two-bedroom residences around the lift, the main stair and a small daylight courtyard.
- G** **Ground ARRIVAL AND PARKING**
The whole ground level is given to arrival: the lift lobby, both stair cores and covered parking beneath the building, with more bays along the plot edges and a gate house on the street.

Wuse II, on a street that *stays quiet*.

Indicative, redrawn from site plan sheet A101 (1:150, October 2025). Bay positions are approximate; the plot, the building footprint and the gate house are shown as on the sheet.

Parakou Street runs through the residential heart of Wuse II, a few minutes from the restaurants and shops of Aminu Kano Crescent, with Maitama to the north and the Central Business District to the south-east. The plot fronts the street along its full southern edge; drawn here in metres from the site plan sheet.

The building · seven storeys on a 35 by 15 m footprint, held back from every boundary	514 m ²
Parking beneath · the whole ground level is open; cars turn in from the gate and park under the residences	6 bays
Perimeter bays · along the west, north and east boundaries, reached through the undercroft	15 bays
Gate house and entrance · a screened vehicle entrance on Parakou Street with the gate house beside it	south-west
Lift cores · a lift and main stair at each end of the lobby, reached from the parking level	two
Courtyard lightwell · a small open court beside the west core brings daylight into every lobby	centre
Trees and planting · eight street trees along the verge, hedges inside the front wall, planters on every balcony	verge

Between Maitama and the city.

5 min	Maitama, across Aminu Kano Crescent: embassies, Transcorp Hilton, banks
10 min	Central Business District, Wuse Market and Banex Plaza
15 min	Jabi Lake Mall and the Jabi lakefront
40 min	Nnamdi Azikiwe International Airport by the airport road

Drive times are approximate and off-peak.

The street, the district, *and every place named here.*

The plot and the landmarks of the previous page on the map of Abuja, with rings at one, two and five kilometres from the gate; the inset shows Parakou Street itself and the entrance.

THE STREET

Heights 777 Plot 777, Parakou Street, Wuse II	1,136 m ²
Aminu Kano Crescent Wuse II's main street of restaurants, shops and banks, a short walk from the plot	0.4 km

MAITAMA

Maitama The diplomatic district north of Aminu Kano Crescent: embassies, ministers' residences, banks	4.1 km
Transcorp Hilton Abuja's landmark hotel on Zambezi Crescent, at the edge of Maitama	3.8 km

THE CITY

Central Business District The Central Area: ministries, the National Mosque and Eagle Square	5.3 km
Wuse Market The city's main market, on Douala Street in Wuse	2.3 km
Banex Plaza The electronics and phone market at the top of Aminu Kano Crescent	0.9 km

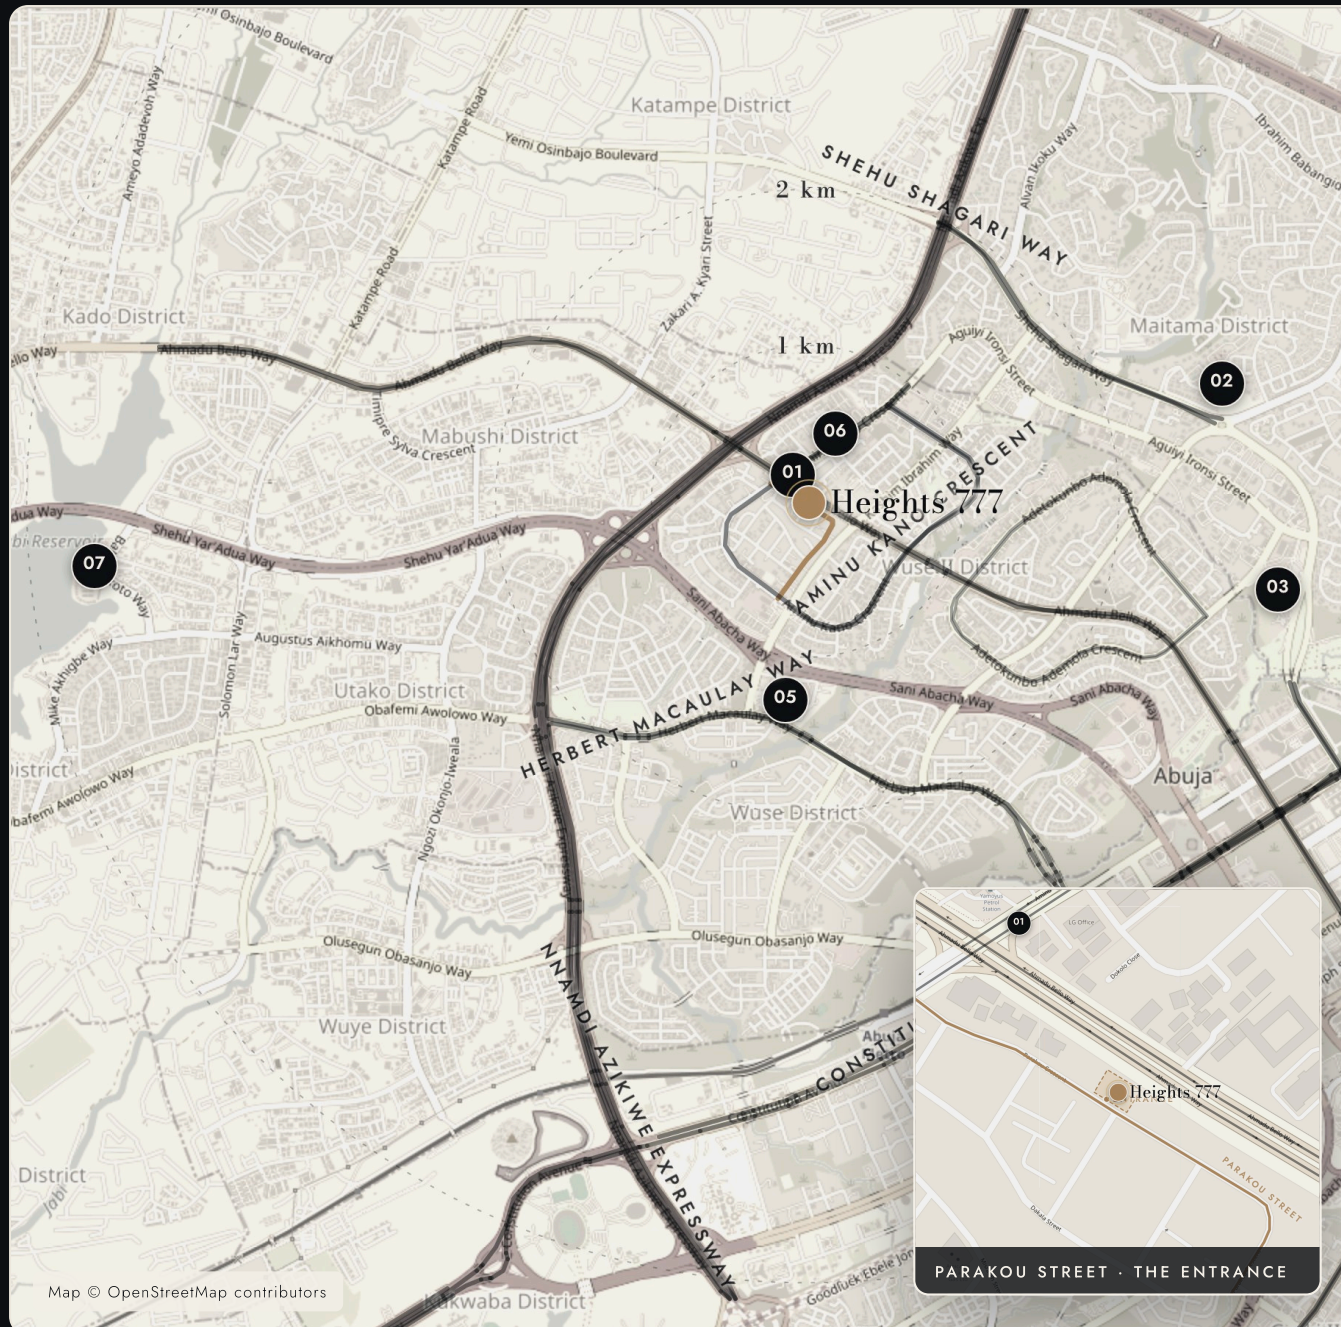

JABI

Jabi Lake Mall Shops, cinemas and restaurants on the Jabi lakefront	6.8 km
---	--------

THE AIRPORT

Nnamdi Azikiwe International Airport The international terminal, by the airport road	42.1 km
--	---------

Road distances from the gate by OpenStreetMap routing; drive times approximate and off-peak; plot outline indicative. The street appears on some maps as Parakou Crescent.

One standard, *every floor.*

STRUCTURE & ENVELOPE

Frame	Reinforced-concrete frame with 350 mm beams; 3.15 m floor to floor on every level
Walls	230 mm sandcrete block in stretcher bond; the lift and stair core clad in dark stone-effect panels
Balconies	Curved slab edges with recessed continuous LED lighting; frameless glass balustrades; integral planters
Roof	0.9 gauge longspan aluminium sheeting, PU-insulated, on a steel truss behind a 1.5 m parapet

OPENINGS & SECURITY

Residence entrance	Double-panel composite pivot security doors to every residence and lobby
To balconies	Triple-panel glass sliding doors on aluminium frames from living rooms, bedrooms, kitchens and dining
Internal	Steel security swing doors on aluminium frames to bedrooms and kitchens; glazed cut-out doors to lobbies and terraces
Site	Walled plot with a 13 m² gate house and a screened vehicle entrance on Parakou Street

1,136^{m²}
SITE AREA

514^{m²}
BUILDING FOOTPRINT

21
PARKING BAYS

2 + 3
LIFTS · STAIRS

Finishes and systems as set out in the architectural drawings and schedules of October 2025. Selections shown in the visualisations are indicative of quality and tone.

FINISHES

Living & lobbies	1200 × 600 × 12 mm polished granite on a 50 mm screed
Bedrooms	600 × 600 × 10 mm vitrified floor tiles
Bathrooms	Every bedroom en suite, with its own walk-in dressing room; a guest WC in every residence
Parking level	600 × 300 glazed ceramic tiles on screed at the arrival level

CIRCULATION & ARRIVAL

Lifts	Two passenger lifts, one in each core, from the parking level to every residential floor
Stairs	A main stair beside each lift, and a back stair by the courtyard
Parking	21 bays: beneath the building at the arrival level and along the plot edges
Daylight	A lightwell courtyard beside the core brings daylight into the lobbies on every floor

Reserve a *residence*.

Eighteen residences across six floors, three to a floor, with the two penthouse floors to the west. Plans, areas and the specification are settled at design stage; the drawings are available on request.

Every residence is entered from a lift lobby, and every bedroom has its own dressing room and bath. A walk-through of the drawings and a visit to the plot can be arranged through Mizan Qist.
